### DIGITAL HEALTH TOOLS FOR PHYSICIANS AND NURSE PRACTITIONERS TO SUPPORT SEAMLESS AND EFFICIENT DELIVERY OF CARE.

eReferral is the secure and seamless transfer of patient information from one point-of-care client management (EMR) into another.

#### How eReferral can benefit you:

- ☒ Save time by auto-populating patient demographics and most required medical info from your EMR.
- ☒ Stay informed about eReferral status and appointment times with EMR updates and email notifications to you and your patients.
- ☒ Improve access by connecting to hundreds of other services in the eReferral network.

eConsult enables physicians and nurse practitioners to send patient-specific non-urgent clinical questions to specialists, and receive advice for treatment in seven days or less.

#### How eConsult can benefit you:

- ☒ Eliminate the need for a face-to-face visit with a specialist.
- ☒ Reduce referral waitlists.
- ☒ Primary care providers can help treat patients while waiting for referral appointments.

#### Online Appointment Booking

Online appointment booking is a platform that allows patients to directly schedule an appointment with their care provider via mobile device or computer.

#### How online appointment booking can benefit you:

- ☒ Allows patients 24/7 access to book an appointment- less phone calls for office staff.
- ☒ Integrated with the EMR which enables flexibility for provider and administrative staff.
- ☒ Highly customizable schedules based on appointment duration, visit type, etc.
- ☒ Decrease no-show rates.
