

Children and Youth Planning Table HPE Accountability Framework

VISION

We envision Hastings and Prince Edward Counties as thriving communities where every child, youth, and family is healthy, supported, and empowered to reach their full potential.

RESULTS

How will we know we're making a difference?

We'll measure progress using **population-level Indicators,** which show whether outcomes for children, youth and families are improving over time. This data helps us **spot trends, identify gaps, and understand areas of need**, allowing for more informed decisions and targeted interventions.

Population data reflects the **characteristics, behaviours and needs of groups within a community,** rather than individuals. Examples include **demographic data, health indicators, education outcomes, economic measures, and social factors.**

By tracking these Indicators, we can see if our efforts are making a meaningful difference.

ALL Children, Youth & Famlies in HPE ARE HEALTHY

1. % of infants or infants with mothers without a primary care provider
2. % of children and youth without a primary care provider
3. % of youth accessing services for mental health
4. # of youth with self reported recent substance use (ages 12-17) (cannabis, smoking, vaping, alcohol, all substances)
5. # of Emergency room visits due to cannabis related harms (ages 0-12, 13-18, 19-25)

ALL Children, Youth & Famlies in HPE HAVE A STABLE ENVIRONMENT

1. % of family involvement with Child Protection Services
2. % of children and youth (families) living in poverty
3. % of teen pregnancies

ALL Children, Youth & Famlies in HPE REACH THEIR FULL POTENTIAL

1. % of students graduating
2. % of students reaching the provincial reading standard at grade 3
3. % of ASQ-SE2 screens completed where social emotional developmental risk was identified
4. % of youth unemployed (defined for older youth ages 19-24/29)
5. % of youth engaged in community extracurricular programs
